THE ALL-NEW XC90, OUR IDEA OF LUXURY

We're Volvo Cars. We put people first.

We designed the all-new Volvo XC90 for a demanding audience, you. Fans of ingenious design and intelligent engineering, Individuals who demand an SUV that expresses who they are – a car that turns every drive into a memorable experience, whether it's in the driver's seat or as a passenger.

Be impressed, quite simply.

This contemporary SUV – which is available as a five- or seven-seater – represents our distinctive take on what it means to drive a luxury car in the 21st century. It's the embodiment of contemporary Swedish design and craftsmanship, both inside and out. Close the doors to your first-class

cabin, breathe its refined, clean air and the stresses of the city fade into the background. Speak commands, touch the screen; you're in complete control. And once you set off, you'll find the all-new Volvo XC90 handles just like a road car. Whether you power down highways or negotiate urban traffic, our clever

driver aids take the hassle out of driving, leaving you to enjoy the ride. This unique and intuitive Volvo driving experience plus our legendary safety means you'll always reach your destination unruffled and calm.

INSIDE YOUR CAR

Travelling in the all-new XC90 always feels special – from the moment you pick up your sculptured remote key. In the lavishly appointed cabin, luxurious materials and superb craftsmanship meet with uncluttered elegance. The airy interior gives you the luxury of space and calm – no matter which of the three seat rows you sit in. The mood of tranquil

seclusion is accentuated by eye-catching details like the “flying wings” controls, inspired by high-end amplifiers. Other touches include the diamond-knurled control surfaces and the beautifully framed tablet-sized centre display with touch screen, which takes pride of place in the center stack. Our CleanZone technologies filter out harmful gases

and particles, ensuring that you and your passengers breathe easy – even in polluted cities. And you’ll love our 19-speaker Premium Sound by Bowers & Wilkins, which offers sublime concert-quality sound for the most exacting audiophiles.

SENSUS – THE INTUITIVE WAY TO INTERACT WITH YOUR CAR

We aimed for the all-new Volvo XC90 to be as natural, intuitive and human to interact with as possible. Volvo Sensus is our unique way of enabling you to communicate instinctively with your car and to connect to the digital world. As an impressively advanced car, the XC90 has a wealth of features and functions which would have been unthinkable just a short time ago.

That’s why it’s all the more important that you should be able to access whichever support, information or entertainment function you need almost instinctively. We think you’ll find that Sensus lives up to this task. And because we love good design, it’s also beautiful to look at and enjoyable to use.

INTELLISAFE - WE PROTECT WHAT'S MOST IMPORTANT YOU AND YOUR FAMILY

The XC90 is packed with intuitive safety technologies as standard. They support you in your daily driving, help you avoid or mitigate collisions and protect you in the event of an accident. Most of the time, you won't be aware of these helpers, but they're watching out for you, day or night. We call this comprehensive, innovative approach to your safety IntelliSafe.

The all-new Volvo XC90 features City Safety – the world's first collision avoidance technology. And now, City Safety also includes Braking in Intersection – another world-first from Volvo Cars. The standard IntelliSafe technologies also include preventive safety features such as Road Sign Information, Lane Departure Warning and Electronic Stability Control. And it goes without saying that you also get Volvo's legendary strength. If you'd like to build on this, the IntelliSafe Surround option is designed to alert you to hazards all around your car, while the IntelliSafe Assist option assists you for a relaxed drive in the city or on the highway

ENJOYING MORE ... USING LESS

Our powerful T5 & T6 Engines deliver amazing performance without compromising on fuel efficiency and emissions. With a super charged and turbo-charged 2.0L petrol powertrain, these engines deliver an astonishing 320 horsepower, with a jaw-dropping amount of torque.
